

YOUR PARTNER IN RISK MANAGEMENT

ADDRESSING THE ENERGY NEEDS OF OUR CLIENTS SINCE THE 90S

Beacom Energy understands that big consumers often need a different approach to their procurement. Whether they are government departments or private entities, We provide larger end-users direct access to the wholesale markets. With this, implementing an energy risk management program can protect your company from the negative financial and operational costs that could impact your company. The type of exposure and your long-term strategy should consider market analysis and your company's unique risk tolerance.

By entrusting your energy risk management concerns to Beacom Energy, you can objectively assess the risk with comprehensive and thoroughly dissected market data. Beacom Energy customizes recommendations based on quantifiable information and the needs our clients. A brief overview:

Customized Strategy - Our process will provide a foundation, but your company is the that can weather different market environments, while staying true to your business objectives and risk tolerance.

Analytical Strength - Our Energy Advisors consider daily, weekly, and monthly market trends, while accounting for fundamental, technical and statistical analyses behind the global market.

Actionable Recommendations - Our advice steers you to energy risk management solutions that make sense for your company. We focus on complete and systematic integration of your strategy through detailed analysis and adjusted to the needs of our clients.

Thorough Reporting - Beacom delivers timely reports addressing accounting, purchasing and operational systems with up-to-date and pertinent information specific and effectual to your company.

Beacom excels at managing energy risk for companies around North America.
